The Coleman Journal

Most Effective Advertising Medium reaching the People of Town and District. The Journal goes into the Homes.

Volume 24, No. 17.

THE JOURNAL, COLEMAN, ALBERTA THURSDAY, SEPT. 6, 1945.

\$2.00 Per Year; Single Copy 5c

FO. Howard Campbell Won D.F.C.

Won Honor Last December on
Completion of First Tour;
Now Awaiting Discharge.

The Distinguished Flying Cross was awarded to Flying Officer Howard Campbell in December of 1944, at the close of his "tour" over Germany. Howard is Coleman's fifth DFC winner and few people locally knew of the honor bestowed on him. It was while in conversation in The Journal office on Tuesday morning that he casually revealed the fact that he was a DFC winner.

Howard is a local boy who received his education at the local schools and prior to his enlistment with the RCAF in November, 1941, he worked at one of the local mines. Six months after enlisting he met and married Miss Martha Bosworth, of Edmonton. They have a young son now. Howard went overseas in June, 1943, and piloted planes over Hitler's Europe. He was also an instructor and was at the same field as that of Elveno Fontana. He was overseas twenty-seven months.

He arrived back in Canada on Aug. 5 on the Ile de France and arrived in Edmonton where his wife and son resided on Aug. 11. He and his family arrived in Coleman for a holiday on Friday, August 24. Howard is now awaiting discharge, but plans on entering a school sponsored by the RCAF when it is possible for him to do so.

This is his wife's first visit to the Pass and on Monday while motoring to Fernie she had the thrill of seeing a little black bear scamper from the side of the road into the bush.

Coleman DFC winners include: C/O Foss Boulton, Calvin Godfrey, Bill Naylor, Bill Irving (the latter is now with Trans Canada Airlines at Lethbridge) and Howard Campbell.

500 Persons Attended Picnic At Star Creek

Picnic Sponsored by First Slovak Mutual Benefit Society.

Last Sunday more than 500 Colemanites, mostly from west Coleman, gathered at Star creek where the First Slovak Mutual Benefit Society sponsored a mass picnic.

Purpose of the meeting was to create a fund, a percentage of which was to be sent to Slovakia to aid in a small degree the citizens of that war-ravaged land.

A large dance platform had been prepared and the large crowd enjoyed dancing to the music of the Royal Canadians. In addition to foodstuffs brought by each individual party, there was an ample supply of "good cheer" which added to the merriment.

The Society's officers have not yet met to hear a report on the day's activities, but it is believed that a nice little sum will be sent to Slovakia.

The Society extends its thanks to all those who attended the picnic.

GAMBLING JOINT RAIDED

On Saturday, Aug. 25, Chief of Police Antle raided a local gambling joint, arresting the keeper and ten inmates.

Appearing in court the keeper was fined \$50 and costs, while each of the inmates was fined \$10 and costs.

RETURNED VETS EXPRESS THANKS TO LEGION AND CITIZENS

Men returning from overseas are losing no time in visiting the Canadian Legion club and expressing thanks to the officers and members for the monthly cigarette gifts which they received during their stay overseas. In addition to thanking the Legion members, thanks is also expressed to the executive of the Overseas Welfare Fund, Ladies Auxiliary of the Canadian Legion for Christmas parcels and to the Coleman public and business houses for their continued support during the years to the Legion thus making it possible for the gifts to be sent in a constant stream.

Those who have expressed their thanks in recent weeks include John McDonald, Laurier McLeod, Dan Daly, Ross Foster, Lorenzo Richards, Alex. Chalmers, Howard Campbell and George Burtink.

As an additional gift to the returned men the Legion is also granting each a year's free membership in the Canadian Legion club.

Coleman Organizes National Clothing Drive Committee

Rev. G. A. Kettlys is Chairman;
Drive Starts October First.

On Tuesday evening in the council chamber seventeen local organizations were represented at an organization meeting of Coleman's National Clothing Drive Committee. M. W. Cooke presided as temporary chairman.

Permanent officers elected were chairman, Rev. G. A. Kettlys; vice-chairman, Mike Opulski; secretary, Miss Mary McIntyre.

Miss McIntyre will write to Ottawa to secure all information necessary to launch the local drive.

National dates for the drive are Oct. 1 to Oct. 20. A second meeting has been called for Sept. 18 at 8 p.m. in the council chamber. It is hoped that organizations who failed to be represented at Tuesday meeting will be represented at Sept. 18's meeting.

LEGION TO BUILD SHELVES TO DISPLAY WAR SOUVENIRS

Coleman branch of the Canadian Legion has been promised a number of war souvenirs and it is planned to build shelves where they will be properly displayed.

The first souvenir received so far is a German air force officer's cap. It is gray in color and made of good material. The decorations are in gray with a touch of silver that sparkles as the cap is turned in one's hand. The German eagle with the swastika is prominently displayed on the cap.

ELLIS DERBYSHIRE MARRIES ENGLISH GIRL

Cpl. Ellis Derbyshire, RCAF, overseas, wired his parents, Mr. and Mrs. George Derbyshire, on Tuesday that he had just been married. The bride is an English girl and hails from Manchester. A letter is on its way to his parents giving some of the details of the wedding.

FLT. LIEUT. E. FONTANA ON WAY HOME

Ft. Lieut. Elveno Fontana is scheduled to dock at Quebec next Sunday on the Empress of Scotland and should be back in Coleman sometime within the next week.

Coleman Seeks To Detach School District 1216 From Municipal Hospital District No. 40

Municipal Hospital Board Voted in Favor of New Site at Last Meeting; E. E. Maxwell, Supervisor of Municipal Hospitals, Visited Pass Last Friday.

On Saturday evening a special meeting of Coleman town council met in motion which seeks to detach Coleman School District 1216 from the Crows' Nest Municipal Hospital District No. 40.

Decision to disestablish the School District was the direct result of the Hospital Board's action on Friday evening last when a majority vote favored retention of the second site, that which is located immediately east of the No. 3 highway steel bridge.

E. E. Maxwell, supervisor of municipal hospitals, Edmonton, arrived in the Pass on Friday last and met the hospital Board at 5.30 that evening. In the morning he had inspected the original site and also the new site. He met the Coleman town council and Wm. White,

Coleman's hospital Board member, at a special council meeting at 1 p.m., at which time he was given an insight into Coleman's attitude in the whole affair.

Following the meeting with the council he and Board chairman E. Williams met the general manager of West Canadian Collieries, who own the two sites.

At the hospital Board meeting when the majority voted in favor of retaining the second site Coleman's member, Wm. White, who voted against the motion, rose and after a few words explaining his position as to why he could not be a party to the change in site, left the meeting.

The town council, upon hearing the decision of the hospital Board, called Saturday evening's special meeting and agreed to detach the Coleman school district No. 1216 from the hospital district. It is now a matter of awaiting the verdict of the Hon. W. W. Cross, minister of public health,

Carnival Mystery Chest Contents Revealed; Two Big Nights of Fun And Frolic Next Sat. And Monday

\$150 in Goods on Display at
Coleman Hardware; Carnival to
be Held Saturday and Monday.

On Saturday morning the Curlers and Elks carnival committee presided at the opening of the carnival mystery chest and displayed the articles in the Coleman Hardware window.

The goods, all of real quality, are valued at \$150. Included in the prize are a cedar chest with a drawer at the bottom, 2 heavy woolen blankets, a chenille bedspread, a gent's leather jacket, an electric toaster, a drip coffee percolator, an electric iron, three pairs silk stockings, a set Rogers' silverware, a 4x7½-foot Axminster rug and "refreshments."

On Saturday morning quite a large number of citizens were seen

to look admiringly at the display.

One popular feature which has had a big play during the past two carnivals, hams and beans, will be absent from the carnival at the week end. This is due to the nearness of meat rationing. However, the blanket booth, dolls and lamps, miscellaneous, etc., will be stacked with quality merchandise. The doll booth will be improved over that of last June. In addition to the merchandise booths there will be the crown and anchor, penny game, darts, etc.

Music for the jitney dance each evening will be supplied by the Royal Canadians.

A gang of men is working this week cleaning the arena and making it in readiness for the week end.

NICK CARMELLO PASSES AT LETHBRIDGE

Nick Carmello, resident of Coleman for a number of years, died in hospital at Lethbridge on Wednesday of last week following a few weeks illness.

He is survived by his wife; one son, John, in Italy, and four daughters, Mrs. Agnes Ewing, of Blairmore; Mrs. Dona Stewart and Mrs. Emily Mousvry, of Coleman, and Mrs. Elsie Slant, of Bellevue.

The remains were brought to Coleman and interment was made in the Catholic cemetery on Sunday afternoon, Rev. Leo Sullivan officiating.

RESIDENTS OF CANADA SERVING WITH U.N. FORCES COVERED BY REINSTATEMENT

Extension of the reinstatement in civil employment act to include those on active service in the present war in the naval, military or air forces of any of the United Nations, who were employed in Canada prior to Sept. 9, 1939, is announced by Hon. Humphrey Mitchell, minister of labor.

The act, administered by the minister of labor through the national employment service, previously covered those who had left jobs to join the armed services of the British Empire, or the corps of Canadian fire fighters, and the merchant marine of Canada and the United Nations.

The act requires employers to reinstate their employees who had a specific length of service, after discharge, under conditions not less favorable than they would have enjoyed had they remained in their employment instead of going into the armed services.

Those who have been on active service with the forces of any of the United Nations may now apply

for reinstatement in their former jobs upon the same terms and conditions as those who have been serving with the Canadian forces.

While the change now made in the legislation, stated the labor minister, will not affect very many cases, it rounds out the operations under the act so that it will apply uniformly to all who have directly aided in the war effort, whether through service with the armed services or any of the United Nations or in the merchant marine of any of our allies.

HONORED

The members of the WMS and Ladies' Aid of St. Paul's United church gathered at the home of Mrs. Robert Holmes last Thursday evening to honor Mrs. W. Kennedy, who had been a member of both organizations and who is leaving for Turner Valley.

Games were played, after which a very nice lunch was served by the hostess. As a parting gift Mrs. Holmes, on behalf of both organizations, presented Mrs. Kennedy with a handbag, for which the honored guest expressed her appreciation.

BELLEVEU SHOW HELD ON LABOR DAY

Attendance was somewhat smaller this year at the Bellevue Show than in previous years. Many really good entries were received in the flower and vegetable classes and the standard set in past years was well maintained in 1945.

OMISSION

In listing the various organizations represented at the recent rehabilitation meeting the name of the Catholic-Slovak Union was omitted.

TRIBUTE TO HAROLD HOUGHTON

Just received Journals with word of Harold Houghton's passing away. I was extremely sorry to read of it. In my estimation the town has lost one of its ding citizens, one who has done much in the bettering of the town's welfare and, during the war, the welfare of Coleman's serving men. I am sure that they and many others will miss him a great deal. I would like to offer my sincere sympathy to his relatives and friends in their great loss.—Cpl. Alfred Jones.

REHABILITATION MEETING

A general meeting of Coleman Reception and Rehabilitation Committee will be held in the Council Chamber on Friday evening at 7.30.

All Coleman organizations are particularly asked to make sure that they are represented.

A. Wilson,
Secretary.

"Chick" Lowe Arrives Home From Overseas

Pte. "Chick" Lowe is back home after several years overseas. He arrived in Calgary on Wednesday and was met by his wife. They returned to Coleman on this morning's train where they were met by relatives.

John McGrath Passed Away At Vancouver, August 24

A former Coleman resident in 1919, John McGrath, 44 years and 9 months, passed away at his Vancouver home on Friday, August 24.

Surviving are his wife and two sons, Michael and John; his mother and three sisters, Mrs. Grace Joy, of Creston; Mrs. Margaret Jordan, of Vancouver, and Mrs. Robert Hoggan, of Coleman.

In 1919 deceased worked at McGillivray Pit. He left Coleman and went to San Francisco where he enlisted with the U.S. Marines. He had resided in Vancouver only four or five years.

The funeral was held on August 29 with Rev. Dean Cecil Swanson, DD, officiating. Burial was in the Ocean View Burial Park.

FOREST FIRE AT MICHEL

Pass citizens on Monday evening watched the sky brighten with the glare of a forest fire which raged in BC. It was learned the following morning that the fire had been in Michel and had destroyed timber on one of the slopes of the mountains which bordered the towns of Michel and Natal.

Many fire fighters worked hard to save the mining property which was in danger of being destroyed at one time. A heavy wind helped the fire spread over a considerable area.

Herman Trelle Murdered By Ranch Hand

World Wheat King Shot in
His Home in California.

San Bernardino, Cal., Sept. 4. (C P)—A murder complaint was filed here today against John Gilberti in connection with the killing of Herman Trelle, five times world wheat king, formerly of Wembley, Alberta.

Mr. Trelle was fatally shot Saturday afternoon while on the porch of his ranch house in the Fontana district near here and died approximately 20 hours after the shooting occurred.

Police said that Trelle told them before he died that Gilberti fired the fatal shotgun blast which struck him in the face and in the side.

Police said that Gilberti was foreman of the ranch before Trelle arrived last June and since that time had been only a ranch hand. A few hours before the shooting occurred Gilberti was dismissed, Trelle told the officers.

An intensive search for Gilberti is in progress throughout San Bernardino county, particularly in the vineyard district. Police say they had found Gilberti's automobile abandoned several miles from the ranch house.

Funeral services have not yet been arranged pending an inquest which will probably be held tomorrow.

To the old-timers who resided here around 1905 Herman Trelle and his family are still remembered.

Mr. Trelle sr. was a lumber contractor in Coleman around 1905 and built the Pacific hotel which today is known as the Empire hotel.

Herman went to school here, being about 13 years of age. The school was located where the Patinon Block stands today and was a two-storey structure. Frank and Arthur Graham both played with Herman in their boyhood days and know him quite well.

The family remained in Coleman only a few years.

School Days Start Again On Monday

Summer Holidays Come to a Close; Noise and Laughter to Come to School Grounds Once Again.

On Monday morning it will be school days once again. Children will gather from all directions on the playgrounds of Central and Cameron schools as the summer vacation comes to an end. The school bell will clang out its dull tones, the students will march to their classrooms and then the teachers will come under the critical inspection of new students. Such are the opening moments of a new school term.

During the past two months all schools have been thoroughly cleaned and decorated with Contractor Joe D'Appollonia making some slight changes to the exterior of Central school.

Classes will commence at 9 a.m. and the children given a list of new school books which they have to secure.

The local stores are ready to meet the school rush, both in books and clothing needs, stocks having been built up in readiness just for this occasion.

Our chief object is to get control of all spreaders of tuberculosis.—Dr. A. H. Baker, Superintendent, Central Alberta Sanatorium.

NOTICE TO CURLERS AND ELKS

In order that all might be in readiness for the Carnival which opens on Saturday evening the carnival committee asks all Curlers and Elks to make it a point to be at the Arena on Thursday and Friday nights at 7.30 sharp, to help fix and decorate booths. Help is urgently required.

GEORGE JENKINS.

THANK YOU!

Now that hostilities have ceased both in the east and west it gives me great pleasure to say thank you to the Overseas Welfare Fund for cigarettes received monthly and to the Women's Auxiliary for the Christmas comforts received during my stay overseas. I also express my thanks to the Coleman public for its financial assistance to these two organizations and thus made possible the cigarettes and comforts which I so gratefully received.

F | O Howard Campbell, D.F.C.

WORLD HAPPENINGS
BRIEFLY TOLD

"Vitriolized ware," reinforced crockery that can't break, is being manufactured in Britain.

Toward the end of the war the British Red Cross was spending £1,000 (about \$4,500) every hour.

About 30,000 acres of forest have been destroyed by seven fires which burned near the Turkish capital for several weeks.

Britain's basic gasoline ration has been increased 25 per cent. This means that motorists may drive 150 miles per month instead of 120.

May 5—date on which German armies in the Netherlands capitulated to Canadian and British forces—henceforth will be celebrated as an annual national holiday.

Eight Norwegian air lines, under the Norwegian Air Ministry, are now flying over 5,600 miles daily. Military planes and personnel are being used.

The first Roosevelt memorial two-cent stamp was sold in Warm Springs, Ga., where Franklin Roosevelt fought his battle against infantile paralysis and where he died.

Thomas Guy, founder of Guy's Hospital, looks again on London. His statue was covered as protection against bombs and was the first "bomb-covered" statue to be unveiled.

The Neue Zeit, organ of the German Christian Democratic Union, said that Adolf Hitler cost Germany 700,000,000 reichsmarks (\$280,000,000,000 at pre-war exchange rates) in debts and war damage.

Producing Penicillin

Potatoes Prove A Perfect Medium For Growth And Mould

United Kingdom scientists have discovered two methods of producing penicillin on a tremendous scale. Potatoes—or even potato peelings—form the basis of the first method, which was developed by research workers of the Highgate hospital, London, reports the British Medical Journal. After treatment with water and hydrochloric acid potatoes have been found to yield an extract which, after further simple treatment, provides a perfect medium for the growth of penicillin mould.

The second method, which was discovered by a young Glasgow doctor, is based on colchicine—a chemical which is used to increase growth of tobacco plants. For six months Dr. Gordon and Mr. J. McKelvie, his laboratory technician, have been trying to find an agent which would double the growth of penicillin mould. They have now discovered the colchicine produces six times as much as before. Moreover, penicillin produced by this new means is stated to be harder than any type previously grown.

Insurance History

It Has Been In Use Since About 900 B.C.

One of the earliest records of the use of insurance is that of the Sea Law, developed on the Island of Rhodes about 900 B.C. This law set up a co-operative plan whereby the loss of a valuable ship would not be borne by one man, but distributed over a large group of people. However, it was not until the 18th century—almost three thousand years later, that a similar plan was devised for insuring human life.

Today, though life insurance is less than 200 years old, there are 70 million policy-owners in Canada and U.S.—Monetary Times.

In the tropics, sea water is so clear that crabs 40 feet below the surface seem to be within reaching distance.

LIFE'S LIKE THAT

By Fred Neher

"The milkman left a note saying he was going away for a week."

Rival For Penicillin

New Antibiotic Drug Is Said To Be Great Healer

An ace-in-the-hole medicine to work wonders where penicillin fails, a drug made from an earth mold that's different from penicillin, is under study at the University of Illinois. The name is streptomycin, and the preliminary performances, in tests with laboratory animals, are almost sensational.

"If penicillin is a wonder drug," says Dr. H. W. Anderson, professor of plant pathology who heads the Illinois work in its biological aspects, "recent results indicate that streptomycin may prove to be the wonder of wonders drug."

The discoverer of streptomycin is Dr. Selman A. Waksman, of the New Jersey experiment station at Rutgers. Preliminary discovery, however, left it still necessary to determine how the drug, in pure state, can be produced economically and in quantity.

Dr. Anderson heads a study of the molds from which streptomycin is obtained. Dr. H. E. Carter, associate professor of chemistry at Illinois, heads a study of the drug's chemical purification.

Streptomycin is one of about 50 anti-bodies, all molds, fungus or micro-organism products like penicillin, now under investigation in the world's foremost medical biological and chemistry laboratories.

The studies at the University of Illinois indicate, however, that even if it should prove successful with humans, streptomycin probably never will supplant penicillin, but would be used instead as a companion drug, since penicillin can be produced more cheaply. It is possible that eventually there may be produced a series of anti-biotic drugs, one of which would supplant the other, but each of which would have its own special field. Dr. Anderson predicts a sharp increase in life expectancy due to the antibiotics and to the medical knowledge gained in war.

Planned A Paper

President Roosevelt Had This In Mind Before His Death

President Roosevelt had in mind starting a newspaper in New York once he completed his fourth term, Stephen Early, secretary to the late president, said.

Mr. Early said Mr. Roosevelt had considered and discussed the project to the point where he had decided the paper should be tabloid size and should print no editorials.

"It will print only news stories in which there will be only facts," he quoted the president as saying. "Give the people plenty of facts and they will form their own opinions."

PAINTING BRINGS GOOD PRICE

A Thomas Rowlandson painting "Vauxhall Gardens," bought for one pound (about \$4.50) in a junk shop, was sold at auction for £2,780 (about \$12,285).

EGYPT'S PART IN GOD'S PLAN

Memory Selection: He hath given food unto them: shaled far his hand: He will ever be mindful of his covenant. Psalm 111:5.

Lesson: Genesis 41:44—42:38.

Devotional Reading: Psalm 111.

The Text Explained With Comments

Joseph's Work During the Years of Plenty, Gen. 41:46-49. The drama of the book of Genesis centres in the triumph of the Covenant religion, the faith of Abraham, Isaac, and Jacob, over all the conflicting forces that oppose its progress. Ancient Egypt, with its corrupt religion and despotic government, might have been expected to crush out all vestiges of the Hebrew faith. But these powerful evil forces were over-ruled by God for good. In the religious development of the human race, Egypt had a part in God's plan.

This providential over-ruling of history appears in the fact that the Pharaoh at the time of Joseph was more religiously-minded than usual, and also that this ruler found it to his interest to be less harsh in his treatment of the people than the aristocratic nobles, or "nomarchs", whom he conquered and displaced. This Pharaoh was a remarkable religious idealist who tried to depose the ruling priesthood from their power in Egypt.

Pharaoh recognized Joseph as a man "in whom the spirit of God is" (Gen. 41:38). In accepting Joseph's interpretation of his dream, Pharaoh acknowledged that Joseph's God had planned the history of Egypt for the next fourteen years, that Joseph is acquainted with the purpose of God, and therefore is worthy of Pharaoh's trust.

Pharaoh had put an end to the power of the nobles, or "nomarchs", and restored the office of Vizier. The affairs of the government were not left in the hands of the Vizier; but also the courts of justice, the collection of taxes, and even the restoration of temples and palaces were under his control. When Joseph was sold by his brothers to the merchants who took him to Egypt the way had been practically prepared, so that it was not at all a strange thing that he should rise to such a responsible position, first as keeper of the prison, then as vizier to the reforming Pharaoh who would be able to trust an Asiatic more readily than one of the nobility or priestly class who was endeavoring to displace from power. Joseph's policy during this period of plenty embodied principles of truth and justice, which are of lasting truth and value. Among these principles are economy, industry, patience, fortitude, and co-operation.

AIR DELEGATE—S. S. Stevens, superintendent of communications and electronic development of Trans-Canada Air Lines who has just returned to Canada from London, England, where he was a Canadian delegate to the Third Commonwealth and Empire Conference on Radio, commonly known as "CERCA" for civil Aviation. This meeting and the Third International Aeronautical Radio Communications conference which he will attend at Rio de Janeiro, in September, are of paramount importance to Canada as they form part of a world-wide communications system affecting the entire air transport industry.

Future Planning

Co-ordination Necessary To Speed Up Civilian Work

If we wish to avoid chaos, needless unemployment, and waste, it is essential that all postwar planning bodies speed up their work and above all co-ordinate so that:

1. There will be reconstruction and civilian work available as quickly as possible, for all servicemen and war workers.
2. That first jobs (housing, replenishing of civilian goods, etc.) can be done first.
3. That public works, municipal, provincial and Dominion be held back for emergency use to take up men and unemployment slack as needed and then authorized in order of their practical importance. In other words, that needed highways, sewers and schools come first and that we avoid the danger of jumping into unplanned public works merely to make jobs if there is unemployment. — Toronto Financial Post.

OUR COMPLETE SHORT STORY—

EARTHQUAKE AT STATE U

By CARL NESSLER

McClure Newspaper Syndicate

"Remember," she said, "this is a case of 'Love me—love my spiders!'"

He slipped the diamond solitaire on her finger. "I'd marry you if it meant taking on the whole Ringling menagerie," he declared.

And in that happy moment Mark Pullison persuaded himself that Betty Paige's hobby of raising spiders would prove no barrier at all to a perfect married life.

Mark and Betty were instructors respectively of geology and astronomy at State U. From her work with telescopes Betty had branched into breeding spiders to spin thread used for fine lines in optical instruments. This was decidedly unpopular with Mark—the very thought of a spider reduced him to the howling jibbies.

He managed to keep himself pretty well under control, though, till a month before the wedding. "Darling," he said, as they sat in her cozy living room, "let's always be as happy as this."

Betty smuggled closer. "Always, Mark."

"Well never argue," said Mark. "There's no reason why two civilized—"

He stiffened, leaped up with a gurgling yell and brunched in frenzy at his arm.

"Goodness, Mark—what happened?" Betty, following his glance, felt to her knees with a cry. "Why, it's Bucko!"

Mark watched, shuddering, while she extended a paper and a tiny spider hopped aboard. Brought to

face level, it seemed to glare malignantly at Mark, its legs quivering with indignation. All but one leg, which dangled.

"You've wounded him!" accused Betty.

"Serves him right," growled Mark. "How'd he get here, anyhow?"

"Bucko loves to travel. He must have sneaked home in my purse."

Mark, his skin still creeping, spoke in sudden determination. "You'll have to get rid of those pets of yours."

Betty opened her eyes—wide. "Isn't that a bit bossy?"

"I mean it. I want a wife with glamour. Not one that drips spiders all over the place."

He should have remembered that temper of Betty's. She said nothing, though her face whitened, then pulled off the solitaire and handed it to him.

"But, Betty—"

"I want a husband who is a gentleman," said Betty frigidly. "Please go!"

Mark strode away—turning at the door for one last look. "Home-wrecker!" he snarled at Bucko, and slammed the door.

Mark had an apology all rehearsed for Betty's entry into the geology lab the next morning. But she tilted her chin and swept past him toward the cage of spiders. Watching her dispense the daily ration of flies, he winced and turned away—and did not see the hand she raised to stop him. He lost five pounds the following week, but made no further attempt to go near her.

And then the seismograph began acting up.

This instrument—a weird assembly of weights, coils and a delicate balance arm—traced a straight line on a sheet of paper looking to a revolving drum. When the line went jagged and crooked, one had to look out—somewhere an earthquake had quaked.

This particular evening the line was a bit uneven, indicating a slight shock about five hundred miles west. Wanting to watch developments,

Mark unfolded a cot and prepared to spend the night.

The alarm aroused him at twelve. Nothing doing yet. He set the clock an hour ahead and sank back in bed, closing his eyes.

Wakeful and wondering why, he remembered that on Thursday nights Betty operated the big telescope upstairs. She was there now. He smothered a desire to go to her—slowly drifted into sleep.

Betty's white figure ran from him. He reached out to catch her—when the ground trembled and fell away. The earthquake! Sweating, Mark awakened in pitch darkness.

Where were the lights? He leaped up in alarm—stumbled. Was it imagination, or had the floor lurched? That quake in his nightmare . . . could it be? Laughing at the very fear, he struck a match and went to the seismograph.

It was true! The earthquake—right here! A terrific shock, too, judging by the line that looked like jagged saw teeth. A miracle the building had stayed together.

Betty! She may have been hurt! Mark blundered to the door, took the stairs in three strides, and burst into the observatory. She was silhouetted near the telescope—probably too paralyzed with fear to move. But, thank God, safe!

"Mark, darling! You did come!"

"She threw her arms around me. 'You do love me.'"

"You're telling me? But save the kissing—we have to get going!"

Ignoring her squeaks he threw her over his shoulder and made for the door. She kept struggling on the stairs and at the bottom managed to shake free. "Mark—are you insane?"

"You can't fool with earthquakes, Betty. A second shock may get the building. The first got the lights!"

"The lights?" echoed Betty. Stepping into the lab she snapped a switch and the lights went on. "I put them out myself a little while ago, you seemed so restless when I looked in on you. And as for an earthquake, I didn't feel any."

"But the seismograph—"

Mark led the way to it. Yes, there was the line, jagged and crooked. They bent close to look through the glass cover of the instrument—then straightened to stare at each other.

"Oh, Mark!" said Betty, her lips twitching. "He didn't know what he was doing. I hope you won't feel too angry at him."

"On the contrary—he's my friend for life." Mark put a week's longing into one lengthy kiss, after which he looked over his shoulder. "Match-maker!" he said—

And winked at Bucko, the spider perching on the balance arm and still making the seismograph line jiggle like two dozen earthquakes—in one.

Prisons in Italy

Easy To Get Into And Easy To Get Out Of

Italian prisons appear to have one great advantage from the point of view of the criminal classes: they are easier both to get into and to get out of than those in other countries.

During the past few weeks there have been all too many reports of prisoners breaking into prisons to release their friends or to execute their enemies while in other cases prisoners have managed to escape by their own efforts—in some cases assisted by their gaolers.

Worry to affect Signor Togliatti, the Communist Minister of Justice, is the revolt in the Regina Coeli prison at Rome, where some 2,500 prisoners have managed to capture the prison but have so far failed to break out.

—Manchester Guardian.

SELECTED RECIPES

COCOA FLAKE SQUARES

1/2 cup shortening

1 cup sugar

2 eggs, well-beaten

1/2 teaspoon vanilla

1/2 cup cocoa

1/2 cup sifted flour

1/2 teaspoon salt

2 cups corn flakes

1/2 cup chopped nuts

Blend shortening and sugar. Stir in eggs and flaving. Sift cocoa, flour and salt together. Combine with corn flakes crushed into fine crumbs and nuts. Add to egg mixture and beat well. Spread in greased baking pan and bake moderate oven (350 deg. F.) about 30 minutes.

Yield: 12 2-inch squares (8x8-inch pan).

HAWAIIAN PUNCH

2 1/2 cups orange juice

1 1/2 teaspoons grated lemon rind.

2 tablespoons lemon juice

1 cup pineapple juice

2 cups water

6 whole cloves

1/2 teaspoon nutmeg

1/2 teaspoon allspice

1/2 teaspoon cinnamon

1/2 cup sugar

1 tablespoon honey

1 1/2 quart ginger ale

Combine orange juice, lemon rind and spices, sugar and honey; cover and let stand in warm place three hours.

Strain over cracked ice; add ginger ale and serve at once. Approximate yield: 3 quarts, or 24 small glasses.

The British dirigible R-34, which landed in New York July 6, 1918, was the first craft of its kind to cross the Atlantic.

2636

From here and there: Walter

Quarrie, who farms in West Gar-

rafrax township, Ontario, has corn

which grew 114 inches in 60 days, a

hybrid variety, seed coming from a

farm in Bloomington. . . . Disap-

pointed when he shot down with a

ride a silver object in the sky, which

he thought was a Jap balloon, farmer

Chas. Paulus of Giscome, B.C., sent

the meteorological balloon back to

Prince Rupert with this note: "Am

returning herewith your balloon."

A silent tribute to retreating veter-

ans reaches the height of patriotism

at Kamack, Sask., where the town

has a big illuminated sign at the

C.N.R. station, "Welcome Home,

Veterans." Moose Jaw has the same

idea. When V-J Day came, a

car looked securely in the garage at

the home of A. V. Wallsten, Kirk-

land Lake, Ont., celebrated as the

born started sounding continuously.

It could not have been tampered

with, investigation proved and it also

proves truth is stranger than fiction.

In a few minutes' hailstorm at

Climax, Sask., 7-inch hail blasted

standing grain into the earth, killed

turkey chickens like atomic bombs;

two days after a 6-acre lake still

stood centring T. Miller's grain fields

. . . Mrs. A. K. McLaughlin of Cape

Chin, Ont., has a spaniel which raised a

litter of six puppies, and all were given

away but one. She was motherly, went

to a neighboring bush and brought

back three baby bunnies to place

beside her lone puppy. . . . V-J Day

at Hanna, Alta., a cafe man, Chin

Lee, came out with a pre-war stock

of chocolate bars, deciding to "shoot

the works" in celebration. . . . At

Guelph, Ont., V-J celebrants threw

in a couple of milk wagons on bonfires, then

an old hare.

Thanking God for the end of the

war, a Manitoba weekly said: "For

certain responsibility to states-

men and individuals, and ending up

the editorial with an entreaty, "we

must have compassion on our neigh-

bors (meaning the enemy), bind up

this wound, pouring in oil and wine

until he will become a friend instead

of an enemy."

Speeding up for winter: Strip

mines operating in Alberta under

federal government sponsorship, to

secure conservation fuel, are now pro-

ducing approximately 4,000 tons of

coal a day. Most of this is being

shipped to Ontario. Mines are in

operation at Taber, Grassy Lake,

Exton and Cameron. Government

sponsored strip mines have produced

about 300,000 tons of coal since con-

struction work on them started two

years ago. . . .

Tragedy and coincidence: Miss

Helen Cameron, elderly resident just

east of Watford, Ont., was struck

down and killed on the highway in

front of her gate by a motorist on

July 31. On the same spot exactly

three years ago in July, 1942, her

brother Donald Cameron of Watford,

was struck by a speeding motorist

and killed.

This appeared in the Yarmouth

Star-Herald-Telegraph, signed "Post

master, Cross Creek, N.S." . . . I

am the aging Postmaster in the ag-

ing building, known as the Post Office

. . . I am called down, called up,

called out, called in, called straight,

called crooked, called cranky, called

thoughtful, called obliging, called

early, called late. People turned away

from the wicket with smiles, frowns,

thanks, or curses under their breath.

Cheques or money expected has a

habit of being late, being always on

time. Rain or shine, early or late,

good times or bad, the path to the

post office is always well trodden,

and hopes rise or fall, or hang in the

balance, after a visit to the Post

Office."

The Gannaque (Que.) Reporter

holds that in municipal politics it is

evident the first half of the term in

office is the best, because as elections

draw near aldermen are loath to take

a definite stand on controversial

subjects; by the time the half-way mark

is reached councillors are fed up with

the petty bickerings and complaints

to which they are subject. All this,

the Reporter says, tends to a rather

unsatisfactory and sloppy running of

the business of the town.

Amhurstburg, in the "Banana

Belt of Ontario," as The Echo per-

sistently tells the world, the new

journal now points out that apud

have the lime-light, giving statistics

showing that from July 4 to August

4, the Harrow Potato Pool graded

and shipped 101,000 bags of potatoes

to all parts of Canada. Big business

from a small beginning, and shows

agriculturists everywhere what can

be done.

Record of service: A. W. Blows,

Mitchell, Ont., town clerk, took his

first holiday in 21 years. He was

missed at a council meeting since July

1924, and even when he had to go to

camp occasionally his wife looked

after the office, also when he was

buying selling Victory Bonds.

The Killarney (Man.) Guide takes

Wool Gathering?

WELL . . . that's not surprising, if you've been counting sheep all night! Why can't you sleep? Can it be that you're bothered by the caffeine in tea and coffee? Try Postum instead!

You'll love its wonderful depth of flavor—not like tea, not like coffee, just a grand heart-warming goodness all its own. And Postum contains no caffeine, nor any other drug that might whip up heart or nerves, or upset digestion.

So easy to fix—right in the cup—just by adding hot milk or boiling water. Enjoy Postum with meals . . . between meals . . . at bedtime—anytime!

Postum

A Product of General Foods

Pre-Cooked Meals

Served On Planes And Can Be Kept Indefinitely

The navy department has solved the problem of providing good food, properly cooked, for passengers on ocean crossings of the N.S. Air Transport Service planes now flying all over the world. It is a service of quick-frozen, pre-cooked meals which can be heated and served in 15 minutes.

The pre-cooked meals are assembled in units of meat and two vegetables on cardboard plates lacquered to prevent the flavor of the paper from passing into the food. They are frozen and stored in a Queens Village plant until ready for use. The food remains good for a year.

The meals, when needed, are placed in a special oven of stainless steel and aluminum construction, weighing 35 pounds and holding six meals. A fan in the rear distributes heat evenly. Although the meals can be cooked in any oven, it might require half an hour longer whereas the special unit does the job of thawing and reheating in 15 minutes.

At meal time, the foods are removed from the cartons. The meals, still on the cardboard plates, are placed in the oven. In 15 minutes they are ready for the passengers, to whom they are served on the cardboard plates—Leo Cullane in a Washington dispatch to the New York Herald Tribune.

Canada's Northland

Food Production Being Extended To Far Northern Points

In the opening up of Canada's northlands, few people may realize the pioneer work done, first by settlers, second by Dominion and Provincial governments, and later developed more rapidly by Experimental Stations, says Dr. E. S. Archibald, Director, Dominion Experimental Farms Service.

The small sub-stations of a few years ago have become the full-fledged Experimental Stations of today, and they in turn through still more sub-stations extend the boundaries of food production farther and farther north, in fact all the way to the Arctic. The limits for commercial production for use in Canadian cities with exportable surpluses cease to be a factor beyond certain points of transportation, but become all the more important because of isolation of the inhabitants of the north country who are developing Canada's mines, fisheries, and fur resources.

NOTES AND COMMENTS

Let's Advertise Ourselves More

It was with a sense of regret that we watched the colored lights that have been strung across our streets since VJ-Day being taken down this week. These small colored lights burned very little electricity yet they gave the main street a gala effect at night and were the first objects that attracted the eye as one entered the main street from the east.

In our travels through the States we passed through many little towns. One or two had colored lights strung across the entrance to main street and these are the few towns that remain long in one's memory as he reminisces on his travels.

We can stand a little color on main street. The carnival is to be held this week end. Several hundred citizens from Pass towns will attend. Those colored lights would have helped to give added gaiety to the occasion.

While on the subject of publicity here is another suggestion which we offer for what it is worth. The town of Macleod has two very handsome welcoming signs at the entrance to main street from east and west. They record the name of the town and give the population figures. Such signs would cost money, but it is money well spent in publicizing the town. Now that tourist travel is soon to boom let's hang out our community shingle.

School Days

School days are almost with us. The bright, happy faces of the younger children will soon be seen as they run hither and yon across the spacious school playgrounds. Their noise and laughter are music to the ears after a silence lasting over two months. The high school young ladies will be seen in fashion's latest styles and trading yarns on their vacation experiences, while the young men, most of whom have been working during the summer vacation, will have stories to tell of their former jobs and the money earned.

The school of today and that of yesteryear has changed radically. When we went to school you started to study at 9 a.m. and with the exception of two recesses you remained in school until 4 p.m. Today the school building resembles a business office as students are seen to enter and leave at all hours of the day. Their study periods evidently permit this practice and their examinations on their year's work prove that no ill effects are suffered.

Coleman has furnished a goodly number of war heroes. These men of today were the boys of yesterday. They roamed the school grounds, banged a softball with all their might, laughed and joked as they leaned out of the class room windows. They took the responsibility of the world's ills on their shoulders and helped give us another chance to make the world a better place in which to live. The youngsters of today have to thank these young men from the Allied Nations for the opportunity of growing up in a free world in which their capabilities are the only brake to future success.

Ninth Victory Loan

Canada's Ninth Victory Loan will open on Oct. 22 and will be the biggest ever floated in this country. The loan will cover Canada's borrowing needs for the next twelve months, making it unnecessary to have another campaign next spring. One large loan now instead of two smaller loans—one now and another in the spring of 1946—means a real saving of time, effort and expense.

Victory has been won in Europe and in the Pacific. The end of hostilities means the end of war costs. But, we face new tasks, and these new tasks bring new needs. So, total outlays and borrowing requirements will continue at high levels.

For instance, men in hundreds of thousands must be brought back to their homeland from overseas. This will take time because of shipping shortages and continuing operations in occupied areas. Meanwhile, they must be paid, fed, housed and cared for in a hundred-and-one different ways.

The wounded and the sick must be restored to health. Veterans will be given a good start in civilian life. War service gratuities and re-establishment credits will be paid.

People in war-torn countries need food, clothing, medical and other supplies to relieve suffering and distress. The United Nations, including Canada, are making gifts of essential supplies to these peoples. Canada is also lending money to countries in war areas to help them buy supplies in Canada urgently needed to overcome the losses and devastation of war. The money Canada will spend and lend in these ways is an investment in the future peace and prosperity of the world.

There are outlays of various kinds to clean up the war program, and to start us on our way towards normal peacetime living.

These tasks, and these needs, are reasons why Canada's borrowing requirements for the next year will remain at a high level even though direct war costs have declined with Victory in Europe and in the Pacific. They are reasons why Canadians are being asked to continue their present savings program for another year.

THE HUMAN TOUCH ON THE HOME FRONT
Many thousands of Canadians materially benefited from the material services of The Salvation Army last year in its Messing Homes and Old Folks' Homes. Prison and Police Court Work. Children's Homes. Children's Summer Camps. Missing Friends Service. Free Labor Service. Men's Homes.

● Out of the waste and weariness of war, humanity looks hopefully to the promise of a better world.

A better world demands better people, the prevention of human waste.

To relieve individual distress, to revive the individ-

ual's hope and self-respect, to turn the individual soul to righteousness... that is the Army's historic mission.

Today The Salvation Army faces the most challenging task in its history. Again it appeals to you for support. Please give generously when your canvasser calls.

... V ...
Of 360 active cases of TB found in x-raying 140,000 Albertans through the mobile chest x-ray clinics, over 50 per cent were over 50 years of age. Most of these were likely "reinfections."

CANADA AT LAST: Touching Canadian soil for the first time at the Wolfe's Cove dock at Quebec as the Canadian Pacific's Duchess of Richmond came alongside on August 18 with 4,000 returning troops aboard are Pte. James Huntley, Calgary, five years overseas; and Capt. B. Morgan, Leamington, Ont., three years over there. By mid-morning the next day the last C.P.R. troop special had left taking the boys home and on August 20 a civilian boat train arrived with passengers for the Richmond's return passage to the Old Country.

this is the Branch Bank where Jack keeps his money—so he does not have to keep his savings at home with the danger of loss, fire, or theft, and can pay bills safely and conveniently by cheque.

this is the Teller in a branch of a different bank in another city, who made sure that the man who presented the cheque was really the man Jack intended to pay. Then he added the amount of the cheque to that man's deposit account.

this is the Clearing House maintained by the banks so that customers' cheques can be exchanged and the banks can settle their accounts with one another every day. From here, Jack's cheque was sent to the clearing department of his own bank, and from there to the branch where Jack keeps his account.

this is the Ledger-Keeper who made sure that the signature was really Jack's. Then he debited Jack's account. The amount is entered in Jack's passbook next time he comes in, so he always knows exactly where he stands.

This is a sketchy outline of what happens when you pay an out-of-town bill by cheque. Many people pay their large local bills that way too. To be able to pay by cheque is a tremendous convenience which costs you little or nothing. Banks are the bookkeepers for millions of your fellow-Canadians.

Letters to the Editor

Blairmore, Alberta,
September 5, 1945.

The Editor,
Coleman Journal.
Dear Sir:

Several years ago whilst attending a convention of the Alberta School Trustees Association in the city of Edmonton I had the pleasure of meeting Mr. Herman Trelle, the world famous Wheat King of Canada, who was a delegate representing the Wembley school district.

Our conversations related to schools and education in the very early days of the Crows' Nest Pass, and now, in view of the foul murder of Mr. Trelle on his ranch at San Bernardino, California, I am sure the following statement given to me by the late Mr. Trelle will be of interest to your readers:

"Our first home was in an old Indian cabin of logs down by the Sulphur Springs near Frank. My first schooling in Canada was in Frank, Alberta, from the opening of the Townsite about 1901 until the Frank Slide on April 29, 1903. In the fall of 1903 until the opening of Rev. Robinson's private school in Coleman about 1904, I attended school in Blairmore. I attended the first school in Coleman and was a student in the larger one built about 1906. In 1907 we moved to Edmonton where I completed high school, and was attend-

ing University when war was declared in 1914." (Signed) Herman Trelle, Wembley Alberta, February 9, 1935.

Yours very truly,
W. H. CHAPPELL.

Theatre Notes

DEANNA DURBIN'S DIALOGUE INCORPORATED IN HER FILM

A purely extemporaneous remark of Deanna Durbin's became part of the dialogue in her new Universal picture, "Can't Help Singing," the technicolor musical, which is at the Palace theatre. Deanna and her leading man, Robert Paige, were rehearsing a scene in which she is supposed to come up behind Bob while he is lying down taking a drink from a mountain stream, and shove his head into the water.

Since it was only a rehearsal, Bob thought Deanna probably would merely touch his head. Instead, she pushed practically his whole head under water. As Bob came up spluttering, Deanna fairly shaking with laughter, "I couldn't help it, something just came over me," she laughed.

"That's great, we'll use that line in the picture," said Director Frank Ryan. "And when you speak it, Deanna, laugh just the way you did now."

So the scene was shot that way. In "Can't Help Singing," Deanna has the role of a young, highly

spirited girl who runs away from home to follow her fiancé out west. However, enroute she meets and falls in love with a gambler, played by Paige, which complicates her life still further. David Bruce has the role of her fiancé. Others in the film are Akim Tamiroff, Leonid Kinskey, Ray Collins.

Deanna sings more in this, her first technicolor film, than she has in any other picture, and the music was written especially for the film by Jerome Kern and E. Y. Harburg.

"TOMORROW, THE WORLD!" HARD-HITTING DRAMA!

"Tomorrow, The World!" Lester Cowan's triumphant screen version of the prize-winning Broadway play, makes its long expected entrance at the Palace theatre on Saturday through United Artists release. Fredric March and Betty Field star in the high-tension drama. Others in the cast include Agnes Moorehead, Skippy Homeier, Joan Carroll and Edit Angold.

A daring and hard-hitting film, "Tomorrow, The World!" deals with the problems which develop when a Nazi-trained youth arrives in the United States and proceeds to try out his Hitler manufactured doctrines on an average middle-class American family.

Skippy Homeier, magnificent child star, makes his screen debut in the role of the young Nazi, Emil Bruckner, a part which he created so successfully in the stage pre-

sentation. In the character of Emil, labelled "the meanest brat in the world" by Broadway critics, Skippy breaks up the romance between Frederic March and Betty Field, assaults Joan Carroll and has three fights with other boys. As an almost human devil, young Homeier has nevertheless won high praise for his magnificent portrayal.

Fredric March and Betty Field, stars of the drama, have the difficult and highly dramatic roles of the lovers who find their romance all but destroyed by the malice of the youngster, but who fight to cure him of the Nazi disease.

Agnes Moorehead, Joan Carroll and Edit Angold have important roles in the action of the film.

Leslie Fenton, recently inviolated out of the British navy for wounds received in the historic St. Nazaire commando raid, directed "Tomorrow, The World!" His first film assignment since he returned from active service with the British.

No disease comes from the gods. Each has its own natural and manifest cause.—Hippocrates.

Public health is purchasable; within natural limitations a community can determine its own death rate. — Dr. Herman Biggs, Chief Medical Officer, New York.

Despite the declining death rate, tuberculosis still kills more young adults than any other one ailment.

LIFE, FIRE, SICKNESS AND ACCIDENT, AUTOMOBILE

Your Support IS VITAL TO RATIONING Mr. and Mrs. Farmer

With other groups, you play a part so that everyone gets a fair share

The FARMER

Under the rationing regulations, you are asked to collect and turn in the coupons you acquire against the use and sale of butter and, when meat rationing is introduced again, of meat; and the coupons you get from the sale of honey and rationed maple products. So that you may buy other meats from your butcher, no more than one-half of the valid coupons in your ration book and in those of your household need be surrendered. To make it easy to send in coupons, you are provided with R.B-61 envelopes which should be forwarded once a month to your Local Ration Board. No postage is required.

The RETAILER

The retailer also plays a part. He must obtain coupons or other valid ration documents against every sale he makes of rationed foods—butter, sugar, preserves and, when meat rationing becomes effective again, meat. Otherwise, he cannot replenish his stocks. He must paste all coupons on gummed sheets and endorse each sheet with his name and address. If his monthly food sales total \$2,500 or more, he is required to operate a ration coupon bank account. He must also give valid ration documents or a ration cheque to his supplier for every purchase he makes of a rationed food.

The HOUSEWIFE

The housewife, too, has rationing work to do. She must know the validity and expiry dates of butter, sugar, preserves and, later, meat coupons so that she can make supplies of these foods last. She must know the coupon values of all rationed preserves and meats. She has to understand the sugar alternative of the preserves coupon in order to do as much home canning as possible and still have coupons for honey, syrups and other preserves. She must guard family ration books carefully and give up coupons for every purchase she makes of a rationed food.

RATIONING is your assurance of a fair share. It is a protection against waste . . . shortage . . . inflation.

That is why farmers are asked to *continue to collect and turn in coupons to their Local Ration Boards - once a month - in the RB-61 envelope.*

Another Policyholder Reports . . .

"WHEN DISCUSSING life insurance with two of my friends who are fathers of young children, I found that

they were particularly interested in learning that I own a policy in The Mutual Life of Canada called

'FAMILY INCOME,' which will provide an income of \$100 a month for my wife at my death. This income will continue until I would have been 65 had I lived, and then, she will receive \$10,000.

"OF COURSE, I have made sure, through another policy in The Mutual Life, that she will also have a certain amount in cash with which to pay bills and to provide a reserve fund for emergencies.

"I DISCOVERED during our conversation that these fathers were not aware that it was possible to obtain a policy with the benefits provided by the Family Income contract, and both of them have now interviewed my Mutual Life representative, whom I recommended to them, and discovered how the policy will fit into their insurance programs."

Have a Mutual Life representative explain the special features of this Company . . . and let him arrange a Family Income policy for you, or whatever policy may be suitable for your particular circumstances.

MOTORISTS PREPARE

FOR BIRD SHOOTING

Many thousands of Alberta citizens who are motorists are expected to take advantage of the opening of the bird shooting season this year.

The Alberta Motor Association has received word of steps being taken to provide needed ammunition for hunters, wartime restrictions having been removed. It is claimed that there will be all the ammunition that is needed this season.

The duck shooting season in Alberta will open north of the Athabasca river on Sept. 3 and close Nov. 24. South of the Athabasca, the season will be open Sept. 15 and close Dec. 15. The bag limit is 20 per day and 150 for the season.

The same dates apply to shooting of geese, with a bag limit of five per day and 25 for the season.

Season for shooting Hungarian partridge is restricted to the southern part of the province. The shooting period is from Oct. 1 to Nov. 24. Part of the northern boundary of the area is the Highwood river and highways No. 1 and 9 to the Saskatchewan boundary. The bag limit is five birds per day and 25 for the season.

Open season for prairie chicken also

is restricted to the southern part of the province, in the area south of Calgary. Bag limit is five birds per day and 25 for the season.

Cock pheasants may be shot throughout the province like Alberta, with its severe winter weather, the release will be particularly welcome.

It has been claimed for some time that large stocks of anti-freeze were in the hands of the manufacturers, and now these will be made available to car drivers.

There is a closed season on ruffed grouse for the province.

REMOVE RESTRICTIONS

ON ANTI-FREEZE SALE A wedding of local interest was solemnized at the United church manse, Marlborough Heights, North Vancouver, on August 9th, when Thelma, only daughter of Mr. and Mrs. D. A. Howe, exchanged vows with Mr. C. D. Ingvar Anderson, eldest son of Mr. and Mrs. E. Anderson, of Lumby, B.C. anti-freeze have been lifted, according to word received by the Alberta Motor Association.

The bride, who was given in marriage by her father, was attired in a powder-blue dressmaker suit with navy accessories and wore a corsage of sweetheart roses.

The bride, who was given in marriage by her father, was attired in a powder-blue dressmaker suit with navy accessories and wore a corsage of sweetheart roses.

While the restrictions on the sale of anti-freeze have been lifted, the only attendant and Mr. Gudmundson, price ceilings which were set some years ago still are in effect. This point

is emphasized by Dominion officials. Motorists have for some time eagerly awaited word of stocks of anti-freeze being released. To those in the province like Alberta, with its severe winter weather, the release will be particularly welcome.

are received at the home of the happy couple.

Immediately after the reception the bride and groom left for their honeymoon, to be spent at points on the coast, and upon return took up residence in North Vancouver.

Out of town guests were Mr. and Mrs. D. A. Howe, Mrs. W. Howe, Mr. and Mrs. S. G. Bannan and Mr. and Mrs. J. R. Warner, all of Blairmore.

MEAT TOKENS—SMALLER UNITS OF A COUPON

Blue "fibrewoodplastic," nickel-size, hole-in-the-centre tokens with "Canada Ration — Meat-Viande" stamped on both sides, will be used for meat purchases less than one coupon's worth when meat rationing returns to Canada.

Tokens, eight to a coupon, each good for 2 ounces to 6 ounces of meat, depending on type, will be used only to make coupon change and cannot be exchanged for "M" meat coupons. No consumer may be given more than seven coupons at any one time.

Conservation, in pace with the whole meat rationing program, is the object of the token system. And conservation it will be, because consumers no longer need purchase to the full extent of one meat coupon—particularly beneficial to small families and people living alone.

Playing safe with TEXTILES

The supply of textiles is not adequate to the demand.

For six years, most of the world output has gone to war.

Victory has not improved the situation.

There will not be enough textiles in Canada for many months to come.

HERE ARE SOME OF THE REASONS

Canada depends largely on other sources for raw materials and for some yarns and fabrics.

A serious manpower shortage still confronts the textile industry of all Allied countries.

Shortages overseas must be met. It will take months before production is resumed in Europe.

Substantial quantities of all kinds of textiles are still required by occupational forces.

Domestic demand for textiles increased sharply during the war. It is still going up.

Civilian clothing needs of returning servicemen and women are swelling the demand here at home.

CONSERVATION IS THE KEYNOTE

This year, production directives have again been issued to the textiles industry.

They are intended to divert output to more essential goods.

But directives alone cannot cure a situation arising from world conditions.

The answer lies in conservation. More than ever, the need is to conserve, to take care of what there is, to mend, make-over and make-do.

CONSUMER BRANCH

THE WARTIME PRICES AND TRADE BOARD

CONSERVE—AND—PLAY—SAFE—WITH—TEXTILES

TO PROVIDE CANADIAN WOMEN with guidance and practical assistance in maintaining the family wardrobe, the Board has prepared a series of advertisements, to assist Canadian women. Each illustrates tested ways of styling new and fashionable models of garments. For valuable hints on style, economy and CONSERVATION, watch these columns.

What Canada Has Done

THERE ARE MANY ASPECTS to modern warfare and many ways in which citizens can contribute to victory. Without doubt the greatest sacrifice is made by the service man who offers his life, and by his family. In other branches of service, however, there are the war workers, the farmers and the bureaucrats who organize the nation for the necessities of war. There are also the many workers in industry, business and the professions who carry out tasks essential to the national welfare. It is agreed that Canada's war effort has been a successful one. More than one million men and women entered the armed services and in both naval and air power the Dominion ranked fourth among the United Nations. In addition, it was here that the great Commonwealth Air Training Plan was carried out, which according to Mr. Churchill, "provided the solid foundation for air supremacy without which victory could not have been won."

Large Sums Of Money Raised

In the field of finance, Canada, although thirty-fifth among the nations of the world in respect to population, made a notable contribution to the cause of victory. Money to finance the war effort has been raised by taxation and by internal loans. War loans, raised entirely within the Dominion have totalled more than 10,200 million dollars and in the last loan there were over three million individual subscribers. At one time during the war, the people of Canada carried the heaviest burden of taxation of any country in the world. During the last fiscal year, the 11½ million people living here paid over \$13 million dollars in personal income tax; more than 311 million dollars in corporation income tax, and 469 million dollars in excess profits tax. In addition to these, there have been numerous luxury, excise, sales and other taxes which have contributed heavily to public funds.

Aid Rushed To Britain

Many momentous events have taken place since the summer of 1940 when Britain, threatened with invasion, was in great need of military machines and munitions. Canada rushed all possible aid across the Atlantic at that time and hastened to speed up war production in her factories and on the land. By 1941, great quantities of munitions, guns, tanks and numerous other vital war supplies were being sent abroad, as well as wheat, meat, eggs and other food products. The full importance of Canada's assistance in this critical period is not yet fully estimated, but it is known to be very great. One British journal, The London Economist, in discussing the part played by the Dominion in supplying food and munitions said in part: "It is right that due honour should be paid to the realities of steel and muscle behind monetary figures. If Canada is prevented by the smallest of her population from taking rank with the great powers, she has made a place for herself in a category all her own. Relative to her resources, her effort is second to none." This is only one of many tributes which have come from abroad and they should be received here with pride and satisfaction.

World Security

Dependence Of Civilization Is On Spiritual Values

Secretary of State Paul Martin in an address to the Canadian Institute on Public Affairs said the world security charter framed at San Francisco had "all the ingredients of success" but there must also be present the disposition and the necessary good faith among the nations concerned to make it work.

"I believe this good faith on the part of the nations now exists," he said. "In saying this I was never more conscious of the need for a recognition of the dependence of civilization on spiritual values. A pure secularian approach will be found wanting. The charter is concerned with the social and economic aspects of the problem.

"Its effectiveness now depends on the call as General Smuts (Prime Minister of South Africa) recently said in Ottawa: 'To an awakened culture and a purified and spiritual outlook in life.' This call and the charter can save civilization."

COURSE TO FOLLOW

The Christian Science Monitor says:

There has been considerable difficulty and delay in coming to general agreement on procedure for trial of war criminals, applied to Germany. When the Japanese come into question, however, there should be no such trouble since the course to be followed by the tribunals has been already laid down by a most famous Mikado than Hirohito:

My object all sublime
I shall achieve in time—
To let the punishment fit the crime—
The punishment fit the crime.

SLOAN'S LINIMENT

Strained? Aching? Stiff?

pat on

Dr. James Richard Whitwell, who died at the age of 81, left his \$20,000 (about \$90,000 savings to patients at St. Audrey's hospital, Ipswich, where he was the medical superintendent for 37 years.

Achieved Ambition

Engineer Has Made Dream Into Reality On His Freightler

Crewmen of the freighter J. J. H. Brown boast that their ship's engine room is the neatest and cleanest on the Great Lakes. And the man responsible is Chief Engineer Fred Vieau, of Buffalo.

Three years of painstaking work completed Vieau's "dream engine room."

The huge "work bench" is equipped with hundreds of highly-polished tools, ranging from small belt punches to huge wrenches. A duplicate set is in use aboard ship and only when one breaks is a crewman permitted to remove a tool from the bench. In drawers of the cabinets are hundreds of other tools.

Vieau's prize, however, is the floor. With ordinary paint he fashioned a huge copy of a compass dial. In the centre he placed a chart of the Great Lakes and its principal ports. Squares painted around the compass give a lineoleum-like effect to the lacquered floor.

Chief Engineer Vieau explained he made up his mind 20 years ago when he first started sailing, that when he reached the top he'd have a "dream engine room" that would be a model of neatness.

His shipmates are sure he has achieved his ambition and they are convinced that nowhere on the Great Lakes is there a ship's engine room as spic and span as the Brown's.

THOMAS W. McDONOUGH, known to thousands of travellers throughout Canada as "the man with the big hat", ended 3 years of rail-roading recently when he retired as general agent, passenger department, Canadian National Railways, at Jasper, Alberta. He acquired his name through the large, ten-gallon hats which he wore while greeting travellers during 20 years service at that point. Mr. McDonough was presented with a billfold and a sum of money by Osborne Scott, passenger train manager, on behalf of friends and fellow workers. Born in Dundas, Ont., in 1880, Mr. McDonough started railroading in 1907 and in 1910 joined the freight department of the Grand Trunk Pacific Railway. He was appointed travelling passenger agent in 1915 and in 1920, at the time of the amalgamation of the G.T.P. and the Canadian Northern, was appointed chief terminal passenger agent at Winnipeg. In 1923, he became general agent, passenger department, at Jasper. Since his appointment to Jasper, he has been a picturesque figure at the mountain resort town and has virtually grown up with the Jasper Park Lodge. He was on the first passenger train to go into Jasper.

Alberta Boundaries

Two Viewpoints On The Question Of Extension

Should Alberta boundaries be extended northward to take in part of the North-West Territories? That question is being raised again in public discussion.

There are two views. One puts Alberta first, the other puts Canada first. Who can best develop the vast wealth of the northland, the province or the Dominion?

Which administration is best for the northland itself? The answer to that at the present time is almost unanimously the Dominion.

Alberta is far enough extended for her population. She is having difficulty getting her present resources developed.

The Dominion, on the other hand, has the financial and executive resources needed to carry the North-West Territories through this development stage. It can give the necessary geological and mining assistance and encouragement—Calgary Albertan.

New Plastic Process

Glass Bottles When Dipped In Mixture Will Not Break

Bottles don't break when they're dropped on the floor, thanks to a new plastic process developed in U.S. Armed by heavy breakage—as high as 80 percent of total shipments of glass jars containing battery fluid for the war fronts, chemists evolved a plastic mixture in which bottles were dipped, producing an encasing film only 25 thousandths of an inch thick. Now when the bottles are dropped, the film holds the broken pieces together and the valuable fluid is saved.

Price Control And Rationing Information

Q.—May I buy meat on meatless Tuesdays and Fridays?

A.—Yes. But in order to conserve meat you are asked to serve meatless meals in your homes on Tuesdays and Fridays.

Q.—Have any coupons in ration book been declared invalid?

A.—Butter coupons 90 to 115 expired on August 31. No other ration coupons have expired in ration book since.

Q.—Has the rationing of small arms ammunition been lifted?

A.—Yes. Rationing of small arms ammunition will come to an end on August 31.

Q.—Do meatless Tuesdays and Fridays start at midnight?

A.—Meatless Tuesdays and Fridays in all public eating places now start at four a.m. and continue for a 24-hour period.

Q.—I have lost my ration book and all the coupons for canning coupons were not used. Will I get these with a new book?

A.—No. Coupons for canning sugar cannot be replaced because the ration administration has no way of telling whether or not they were used before the book was lost.

Please send your questions or your request for the pamphlet "Consumer's News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

A World Language

Proposes That English Should Be Taught In Every School

A multilingual member of the British parliament proposed, that the whole world be taught English in an effort to keep the peace.

Advocating his system of revised English as a universal tongue, Dr. Mont Follick, Labor member for Loughboro, told the House of Commons that language differences erected barriers between nations.

He suggested that \$30,000 (\$135,000) be appropriated to establish a chair of philology at London university to make English a world language and offered to put up £5,000 himself if the government would raise the balance.

In 1938 Dr. Follick, who speaks six languages, invented a system of simple English which has 150 fewer fundamental words than basic English.

SMILE AWHILE

Officer: "I ought to arrest you for driving like that!"
Dumb Dora: "But, officer, you can't arrest me. This isn't my car and I haven't any license."

"Are you taking precautions to prevent the spread of this disease?"
Oh, yes, doctor, we bought a sanitary drinking cup, and we all use it."

"Is Jack concealed?"
"Concealed? Why, he joined the Navy to let the world see him!"

Judge: "Can't this case be settled out of court?"
Klily: "Sure, that's what we were trying to do, your honor, when the police interfered."

"That was a beautiful hat, Pat, your wife wore to church last Sunday. It was so high I could hardly see the pulpit above it."

"It should have been beautiful, Mike; an' if she'd worn the bill that came with it, you wouldn't 'a' seen the steeple!"

Woman (in police court, charged with assaulting her husband): "I asked him if he loved me, and he was so long thinking about it that I hit him with a mop."

Mistress (during cleaning): "Be careful with those books, Jane. Some of them go back to George I."

Maid: "Yes, and some of them ought to go back to the village library, ma'am."

Sadie: "That husband of mine is a worm if there ever was one."

Daisy: "Yes, I just saw a chicken pick him up."

Constantine (to a gentleman staggering home at 3 a.m.): "Where are you going to at this time of night?"

"To a lecture."

TRAINING BUS DRIVERS

To speed up training of drivers to replace hundreds of girls who have left the service through marriage, members of the Women's Royal Naval Service are taking lessons from London bus drivers.

Quality Guaranteed

"SALAD" TEA

MEET A CWAC—

"I was in at the beginning of recruiting and I'm getting out two days after it has been suspended," remarked Captain Patricia A. M. Quinn, C.W.A.C. Recruiting Officer for M.D. 12, and daughter of Mr. and Mrs. S. J. Baker, Moose Jaw, Sask.

Quinn became a member of the Canadian Women's Army Corps in January, '42, and received her basic training at St. Anne de Bellevue, Que.

At the conclusion of the course she was posted to the CWAC Staff Office, M.D. 12, Regina, Sask., where all recruiting for the Corps was being done at that time. While Capt. Quinn was an Officers' Training Course at St. Annes in July of the same year, a Canadian Women's Army Corps Recruiting Office was established under the direction of Lt.-Col. A. W. Pascoe. Upon the completion of her O.T.C. she was posted to M.D. 12 as CWAC Recruiting Officer, with the rank of Lieutenant, being promoted to the rank of Captain in July, '43.

"In my 40½ months of service in the Canadian Women's Army Corps," continued Capt. Quinn, "I have always served in M.D. 12. I have recruited girls from all walks of life and all parts of Saskatchewan, and I've found that Saskatchewan recruits rank high in comparison with girls from other parts of the Dominion. The girls have done a swell job in this war, and I am sure that being a member of the Canadian Women's Army Corps has helped to broaden their outlook on life, and has taught them to live together co-operatively. It is this type of girl who will help us build a better and more lasting 'civilized street'."

It has been a great pleasure to have been a member of such a splendid organization as the M.D. 12 Recruiting Unit.

Capt. Quinn is the wife of F. L. John A. Quinn, also of Moose Jaw, who is at present stationed with the R.C. A.F. in Vancouver, B.C.

A PAT FOR THE PADRES—

Sometimes, somehow, quite unintentionally, the Padres are placed in the "unwanted" and "unwanted" class. They do so much and we hear so little about them. When Sunday morning rolls around it generally means church parade for all CWAC personnel not on duty or on leave. Although a number of us balk at the idea of arising to attend the morning service (the one and only morning that we could sleep in) and have even gone as far as to wish there were an "open season" on all Padres in general, the CWACs bark is worse than her bite. We know, deep down in our hearts, that the Padres are the first ones to whom we run when we find ourselves in a tight spot and need guidance.

So we want compassionate leave—ask the Padre! Maybe he can make the O.C. see that it is necessary; we can't! We've decided to get married in a hurry, so we see the Padre and beg again he might be able to put in a good word for us. And so it goes; we feel we haven't a friend in the world, but there's the Padre's office with the door open and pouring out our grievances for half an hour or so to a sympathetic ear, we find that life isn't so bad after all. The Padres stood by on the beaches of Dieppe and they'll be standing by to help us find the right way down the road that leads to "civilized street!"

BIRTHDAY PARTY FOR CWAC—

Members of the Canadian Women's Army Corps officially celebrated its fourth birthday August 13th. Cakes with birthday candles, dances, parades and parties were the order of the day throughout the CWAC camps in Canada and overseas. In a letter addressed to Col. Margaret C.B.E., Director General of the C.W.A.C., Major-General A. E. Walford, C.B.E., M.M., E.D., said: "On behalf of the Minister of National Defence and the members of the Army Council I extend heartfelt congratulations to you on the fourth birthday of the Corps, and our sincere thanks for its splendid contribution to the Canadian war effort. The work of the C.W.A.C. has been of the greatest value to the Canadian Army both overseas and in Canada. I am confident that the members of the Canadian Women's Army will continue to play their vital role until such time as the return of our men and women from overseas completes the final wartime task of the Canadian Army."

Untouched By Hand

All Family Allowance Cheques Are Made Out By Robot

Reginald Hardy in the Ottawa Citizen says: Members of the 1,237,754 families who receive family allowance cheques might be interested in knowing that those same little slips of paper come to them absolutely untouched by hand.

Who fills out the cheques, then, and stamps them with the proper amount, types in the payee's name, and then signs them, thus making them legal tender?

The answer is Ruby, the demon calculator! Ruby is a robot, one of the super-duper robots of this 20th century age of robots. She's an amazing collection of gears and wheels and wires. Just touch a button and Ruby goes into action. All you have to do is to give Ruby a few thousand blank cheques and her directions and she gets on with the job. Wheels whirl and gears grind, keys click up and down with amazing speed, ink splashes from her robot pen, and presto! she has the job done.

Ruby has a number of sisters—one in each province of the Dominion—and Hon. Brooke Claxton, Minister of national health and welfare—gave newspapermen a few of their vital statistics.

Ruby and her sisters cost about one-quarter of a million dollars. Ruby, alone, can write, address and sign 3,600 cheques an hour. She keeps a record of what she does, too, and she never makes a mistake.

Ruby can do in a few hours what it would take hundreds of clerks days to do. She is a speedster, a mass-producer, the perfect civil servant.

Building Homes

Men In Cariboo Putting Up Houses That Are Beautiful

Elmore Philpott, in the Ottawa Citizen, says there is no country in the world that has the super-abundance of building material that Canada has. We have what it takes to build houses. We have the men and women who can help build them. And we have a vast number of people crying out for places to live in.

In the Cariboo I saw men and women working side by side building houses that are as fine as any in the entire world. True, they are made of fir logs. True, the houses are but a few hundred yards away from the finished houses. But the workmanship going into these new homes is really something to look at. The King of England, in Buckingham Palace, has no more beautiful nor wholesome place to live in than some of these pioneer jack-of-all trades are building for themselves. For let nobody run away with the idea that these are make rough-and-ready one-story log shanties from the wind and snow. Some are great lodges, two storeys, with really wonderful hand-work done on the logs around windows, doors, and on the pillars in the main living room.

GEMS OF THOUGHT

SHARING ENLIGHTENMENT

Let your light so shine before men, that they may see your good works, and glorify your Father which is in heaven.—Matthew 5:16.

There is no fit search after truth which does not, first of all, begin to live the truth which it knows.—Horace Bushnell.

The thing most important is what we do, not what we say. God's open secret is seen through grace, truth, and love.—Mary Baker Eddy.

A lighthouse sounds no drum, it beats no gong; yet far over the waters, its friendly light is seen by the mariner.—T. L. Cuyler.

If we cannot be a lighthouse, let us be a tallow candle.—Moody.

One taper lights a thousand, yet shines as it has shone. And the humblest light may kindle a brighter than its own.

—Hezekiah Butterworth.

Lydia E. Pinkham's VEGETABLE COMPOUND

CANADA'S NINTH VICTORY LOAN CAMPAIGN WILL BE LAUNCHED ON OCTOBER 22

OTTAWA.—Canada's ninth and biggest Victory loan will open Oct. 22 and no loan campaign will be staged in the spring of next year.

Finance Minister Isley announced in an appeal to Canadians to continue their savings campaign for another year.

The finance minister said the ninth loan would really be two loans in one and no new loan would be launched in the spring of 1946, but the sale of war savings stamps and certificates would continue.

He did not immediately announce the objective of the new loan nor indicate whether further loans would be floated after the spring of next year.

But the fact he said it would be Canada's biggest loan indicated the objective would be higher than the minimum goal of \$1,550,000,000 in the eighth loan, Canada's biggest to date, which ended last May and to which Canadians subscribed a record of \$1,568,927,350.

Mr. Isley said because of war-end reductions in Canada's outlays it was possible for the ninth loan to meet the Dominion's borrowing needs for a 12-month period. Up to now each Victory loan aimed to cover needs of only six months, so that the ninth loan was really two loans in one.

Despite the end of hostilities, Canada's borrowing requirements continued to reflect the cost of war and its aftermath, he said. The maintenance and pay of Canada's armed forces awaiting demobilization, the costs involved in their return to civil life, the need for medical care for wounded and costs of forces remaining abroad as occupation units were

major items reflected in the large goal which had been set for the ninth loan.

The United Nations, including Canada, were making gifts of essential supplies to the peoples of war-torn countries and the Dominion was lending money to countries in war areas to help them buy Canadian supplies. Also there were outlays of various kinds to clean up the war program and start Canadians on their way toward normal peace-time living.

"These tasks and these needs, are reasons why Canada's borrowing requirements for the next year will remain at a high level even though direct war costs have declined with victory in Europe and in the Pacific," Mr. Isley said. "They are reasons why Canadians are being asked to continue their present savings program for another year."

"Plans to win the peace—plans for high employment and prosperity in the days to come—are now being laid. Continued saving over the next year will help these plans succeed. "War production has come to an end. Production for civilian use is on the way up. But, the supply of new things to buy at current prices is still very much less than the amount of spendable money in the hands of Canadians. As long as this condition remains there will be upward pressure on prices, pressure which could lead to inflation, then and there will be mass unemployment, misery and hardship."

Saving increases this pressure. Saving reduces it. So continued saving, by the purchase of ninth victory loan bonds, helps to keep the costs of living under control.

ARREST COUNTERFEITERS

PARIS.—Paris police announced the arrest of a gang of persons charged with manufacturing and distributing nearly 100,000,000 francs in 1,000-franc notes during the past two months.

"SIR" CHESTER—Admiral Chester W. Nimitz, commander-in-chief of the U.S. Pacific fleet, is seen with his new decoration, Order of the Bath, Knight Grand Cross, which he received from the British fleet commander, Admiral Sir Bruce Fraser. For Nimitz the knighthood is honorary.

ERSATZ FOOD

Some Factories in Germany Are Re-planting Re-planting

21ST ARMY HEADQUARTERS.—Some of Nazi Germany's Ersatz food factories—producing such things as artificial chicken eggs and yeast products made from wood—are being reopened in the British occupation zone. This "phony food", surprisingly in high protein content, will help supplement the German civilians' diet for what officials predict will be the toughest winter in the country's history.

CANADIAN PILOTS

New Regulations May Effect Men Who Cannot Pass Medical Test
TORONTO.—Legendary figures in Canadian aviation, the men who "opened" the north country and through the war years flocked to the R.C.A.F. and the ferry command, now face the thing they fear most—being grounded, "washed out".

New regulations are reported on the way which will affect all Canadian pilots. The medical standard is to be stricter than ever before, with more electro-cardiograms, which record heart history, and extra-special eye tests.

Many of Canada's best-known commercial and bush pilots are veterans of the First Great War and now are between 47 and 52 years old. Some of them may be grounded by the new policy.

"It isn't because of new medical standards but because we're all getting older every day," said Stewart Graham, assistant director of civil aviation for the department of transport. He said his department had to make certain allowances for "the fellows up north who for years carried the burden of Canada's aviation progress." Conditions differed in bush flying and in operations around an air terminal.

Some veteran pilots, it was reported, are planning a protest against the new rules. They point to "Pop" Cleveland, oldest transport pilot in the United States, who is 62, and to Jimmie Doolittle, who has flown in Canada with many of them. "Doolittle was first off the carrier Hornet en route to Tokyo at 55," they claim. "He's still flying."

WAR WORKERS

State 2,000,000 Workers Lose Jobs In United States

WASHINGTON.—Robert C. Goodwin, director of the United States employment service, estimated nearly 2,000,000 United States war workers have lost their jobs since Japan surrendered. Available jobs in general are at pay "substantially below" that of the terminated war jobs.

He said he expected the appearance of more higher-paying jobs after industries have reconverted to peacetime production.

UNITED NATIONS CONFERENCE OF FOOD AND AGRICULTURE ORGANIZATION TO BE HELD

COMMITTS HARA-KIRI—General Horechika Anami, Japanese war minister, committed hara-kiri following the surrender of Japan to the Allied powers.

CONSPIRACY CHARGE

Lodged Against Commander Of Notorious Concentration Camp

BAD OEYNHAUSEN, Germany.—An official charge of conspiracy to commit mass murder was lodged jointly against Commandant Josef Kramer of the notorious Belzen concentration camp and 46 guards, including 19 women.

The indictment was received from London by the judge advocate general's office of the 21st army group and forwarded to the cells where the accused had been imprisoned two months pending war crime trials.

The defendants will be given several weeks to prepare their defence and a choice of British or German counsel.

WAR VETERANS

Are Pouring Much Money Into Housing Plans

OTTAWA.—Canada's war veterans are pouring millions of their discharge and gratuity dollars into housing and the things that make a house a home, the department of veterans affairs indicated.

Announcing that a total of \$4,275,680 has been paid to veterans in re-establishment credits, Veterans Affairs Minister Mackenzie said the department believes ex-servicemen and women have committed at least \$20,000,000 in the housing field.

TWO DATES USED

LONDON.—The Russo-Chinese friendship treaty and co-related agreements were signed in the year 24—according to the Chinese calendar. The texts broadcast from Moscow used both the western and Chinese dates. China counts its modern calendar years from the Chinese revolution in 1911—34 years ago.

COMMENT ON THE FINDING OF THE SEED GRAIN TRIBUNAL ANTICIPATED BY GOVERNMENT

OTTAWA.—Demand that relief debts from the provinces to the Dominion be cancelled before the Dominion make further agreements to surrender tax rights, voiced by Provincial Treasurer Finnes and Attorney-General Corman of Saskatchewan in a comment on the finding of the seed grain arbitral tribunal, was anticipated by federal officials.

Such a stand was forecast in statements made by Premier T. C. Douglas during the opening phase of the Dominion-Provincial conference three weeks ago.

Mr. Douglas in his formal speech at the conference said Saskatchewan was willing to give up the right to collect income, corporation and estate taxes in return for enlarged subsidies as proposed by the Dominion government but such subsidies should not be subject to set-off or reduction for any reason. He also is reported to have informed other officials at the conference that existing relief debts should be cancelled.

The question before the tribunal was whether the Dominion, under the wartime taxation agreement, had the right to set-off a debt due the Dominion by a province against the subsidies it pays the province in return for keeping out of the income and corporation tax fields.

The decision of the arbitral tribunal majority, in the view of federal officials, established the right to set-off in respect of that agreement. Any future agreement will be subject to negotiation.

If deductions from subsidies payable to Saskatchewan continue at the rates indicated in the schedule

OTTAWA.—Plans for the first conference of the food and agriculture organization of the United Nations, to be held in Canada Oct. 16 at a point not yet settled, were announced from the office of Prime Minister Mackenzie King.

More than 20 nations, the minimum required to set up the F.A.O. have now agreed to accept the constitution of the organization and are therefore entitled to send official delegations.

F.A.O. will thus be the first of the new permanent international organizations to come into existence.

Plans for F.A.O. were first conceived at the United Nations conference on food and agriculture held at Hot Springs, Virginia, in 1943.

The objectives of F.A.O. are to improve efficiency in the production and distribution of all food and agricultural products; to raise level of nutrition and standards of living; to better the conditions of rural populations; and to contribute by these means toward an expanding world economy.

The conference in Canada will take the necessary steps to organize F.A.O. and will formulate plans for its work.

F.A.O. will be concerned not only with agricultural production but with forestry and forest products and with fisheries.

Through F.A.O. nations will be able to obtain the service of technical missions equipped to make surveys and assist in the solution of nutritional, agricultural, forestry, and fisheries problems.

BLACK HOLE

Allied Prisoners Rescued From Japanese Confinement Camp

TOKYO BAY.—Five hundred Allied prisoners of war were rescued from Japanese confinement and the navy commander in charge of the operation asserted "there never has been a blacker hell hole than the prisoner of war hospital we are now evacuating."

The evacuees—nationality not stated—were transferred to the hospital ship Benivolence, suffering from "fractures, open wounds, concussions and burns."

"In general, they were suffering from the worst malnutrition imaginable," said the naval officer. "A message from the cruiser San Juan said 'bestial beatings were common,' and that 'insupportable dens of brutism' were maintained by the Japanese."

The prisoners included the United States marines' 26-plane ace of the Solomon, Maj. Gregory Boyington. He had been missing since Jan. 3, 1944.

"Cheers of the prisoners as our boat hove into sight brought tears to our eyes," said the message.

HALIFAX.—H.M.C.S. Mimac, the first of four Halifax-built Tribal class destroyers, will be commissioned here Sept. 12.

Pacific Army And Air Force Will Disband

OTTAWA.—Prime Minister Mackenzie King announced the disbanding of the Pacific army and air force and said Canada would not participate in the occupation of Japan with the exception that one or two naval units might operate in Far East waters.

Mr. King said the army and air forces—totalling about 53,000 men—will disband immediately the Japanese signature is placed on the surrender terms.

"All arrangements to this end have already been put in hand with a view to the speedy demobilization of the personnel affected in accordance with established procedures covering all service men and women," Mr. King added.

The Pacific 6th division had started to concentrate and regroup at Camp Shilo, Manitoba, Barrfield, Ont., and Debert, N.S. while Maj.-Gen. Bert M. Hoffmeister, its commander, had established headquarters at Brockville, Ont.

The Pacific men will go back into the demobilization stream getting their discharges when their appropriate point scores come up.

Air Vice-Marshal Roy Slemmon had commenced training his R.C.A.F. squadrons at eastern air command stations in the Maritimes. Now these men will also go into the demobilization stream.

The navy, however, is already committed in the Pacific with the anti-aircraft cruiser Prince Robert on a mercy mission with medical supplies to Hong Kong and the cruiser Ontario reported in Japanese waters. Mr. King said "one or two units" might conceivably remain with the security forces. He admitted both these ships were in far eastern waters but gave no details.

NAMES OF PRISONERS

Will Be Released As Fast As Possible From Japan

ATSUGI AIRFIELD, Near Tokyo.—The fastest possible means will be provided to transmit the names of prisoners released by Allied occupation of Japan. Latest reports indicate the prisoners may be in better condition than first thought.

As quickly as possible lists giving the bare fact that the prisoner is safe in Allied hands will be rushed by air courier to Manila where the recovered persons office has wireless facilities to dispatch names for all Allied governments.

After 24 hours, when the governments have a chance to notify next-of-kin, the names will be released to press representatives in the theatre.

TO REDUCE U.S. NAVY

WASHINGTON.—United States Navy Secretary Forrestal said the navy hopes to reduce to 500,000 men and 50,000 officers within a year. This will mean the discharge of 2,839,000 men.

A KINDLY ACT—Corporal L. Ritarose is a happy man. His Excellency, The Right Honourable the Earl of Athlone, graciously consented to autograph the corporal's fiancée's photograph during a tour of inspection of the Montreal Military Hospital. His Excellency, accompanied by Her Royal Highness the Princess Alice, officiated at the official opening, which took place August 23rd. Corporal Ritarose, a member of the Regiment de Maisonneuve, was wounded during the heavy fighting of the Normandy campaign. N/S Lieut. E. A. Brown at right.

This sign designates the lab in Montreal where 340 scientists have worked effectively on the war's greatest secret weapon.

Modern lab at University of Montreal. Here is where Canadian scientists worked on the atomic bomb.
